

COMPARISON OF SCHOOLS THAT COORDINATE STUDENT GROUPING WITH AFTERSCHOOL PROVIDERS vs. SCHOOLS THAT DO NOT COORDINATE WITH AFTER SCHOOL PROVIDERS

Typical First Grade – 60 students, had been in 3 classrooms, but now 6 groupings of 10 students each

Numbers represent students needing after school care, **Letters** are students who can go home after school

NO COORDINATION

Day 1	School Day	1 1 1 1 1 U U U U U	2 2 2 2 2 V V V V V	3 3 3 3 3 W W W W W	4 4 4 4 4 X X X X X	5 5 5 5 5 Y Y Y Y Y	6 6 6 6 6 Z Z Z Z Z
	After School	1 2 3 4 5 6 1 2 3 4	5 6 1 2 3 4 5 6 1 2	3 4 5 6 1 2 3 4 5 6	U U U U U X X X X X	V V V V V Y Y Y Y Y	W W W W W Z Z Z Z Z
Day 2	School Day	1 1 1 1 1 U U U U U	2 2 2 2 2 V V V V V	3 3 3 3 3 W W W W W	4 4 4 4 4 X X X X X	5 5 5 5 5 Y Y Y Y Y	6 6 6 6 6 Z Z Z Z Z

If even one student becomes ill, as shown by the **3**, then without coordinated groupings every classroom is infected and spread to all 60 students and 6 teachers and 6 afterschool staff within days.

COORDINATED GROUPINGS

But if the groupings are coordinated and do not mix, then even if one student becomes ill, the exposure is limited to only the 10 students and one teacher and one after school staff.
